Africa Forum, 100 innovations for sustainable development :
AgroDiaspora Knowledge eXchange

STATIM Technologies and **NamSor™ Applied Onomastics** have submitted a project for consideration, responding to a call for projects by the French Ministry of Foreign Affairs 'Africa Forum, 100 innovations for sustainable development'.

The AgroDiaspora eXchange project is to build a knowledge database and community website that will list,

-on one side: (1) transformation projects in the field of agriculture (2) financing needs (3) local resources
-on the other side: the resources of the African Diaspora to bring (1) expertise (2) support to financing requests (through contacts and credibility)

This tool will help measure the ability of the local development projects to address the challenges of climate change. It will generate an ecosystem between the African diasporas and the local communities. It will offer an opportunity for leading scientists, engineers, entrepreneurs of the African diasporas to contribute positively to the development of Africa, not just with remittances but also with expertise and coaching.

The main objectives are: To put in relation local projects with the potentialities of thousands leading biotech and agro scientists of African heritage around the world. To improve the success rate of local projects through coaching and external expertise. To generate clusters and improve the overall attractivity of agricultural transformation projects in Africa in terms of Foreign Direct Investments (FDI).

About

Africa Forum, 100 innovations for sustainable development is an initiative of the French Ministry of Foreign Affairs to gather, during the Elysée Summit, African innovators who contribute to sustainable development, African entrepreneurship and inclusive growth, and help satisfy the needs of populations.

STATIM Technologies is a consulting firm based in Congo Brazzaville specialized in Enterprise IT, mainly SAP and Business Analytics, with clients such as TOTAL EP, ENI. STATIM organized the first SAP Forum in Africa. http://www.statim-technologies.com/statim-technologies/
